Internship Field-based Activities Summary Report and Validation

Directions: This Internship Field-based Activities Summary Report is for your use as a planning worksheet. Post this report to your e-Portfolio wiki/blog/Google site monthly to document completion of your activities.

As you plan your campus- or district-supervised Internship hours, do the following:

- Include at least one campus- or district-supervised activity under each of the 33 ISTE Technology Performance Indicators associated with the eight Technology Facilitation Standards.
- Make sure your campus- or district-supervised activities total a minimum of 100 hours as specified in the eight Technology Standards.
- Follow the guidelines on page 37 to reflect on each completed activity.

Your site mentor will validate the hours earned at the end of your Internship. All hours must be completed before you enroll in the Internship course, EDLD 5388/5370 *Please note that course number changes in Fall 2010*.

Once complete:

- PDF the Validated Summary Report. This report must be signed by your site mentor.
- Create a new page on your wiki, titled “ Completed Internship Field-based Activities Summary Report”
- Post the completed Internship Field-based Activities Summary Report to your wiki.

Field-based Activities Summary Report and Validation: Reflection Guidelines

Instructions: You are required to reflect on each of your field-based activities by completing a reflection that should contain a minimum of 250 words. These reflections will be used to assist you in completing Week 5 of your EDLD 5388/5370 Internship comprehensive exam/final report. Students should use the guidelines below to reflect on each of their field-based activities citing textbook references as well as three additional reference when writing each reflection.

Reflections allow you to analyze on the knowledge you gained from the Internship activity and the associated Standard/Indicator associated with the activity as well as how the activity helped you master the Standard/Indicator. The act of reflection is influenced by constructivist theory. In essence, it is a way of thinking that allows you to make adjustments to your beliefs or concepts, to learn from your or other's mistakes, to recognize progress you think you have made, and/or to identify needed changes in attitude, disposition, decision-making, actions, or behaviors.

Reflection at a critical level means writing text that reveals your opinion of the reading or experience, why you hold that opinion, how the experience/assignment/reading could be improved, how you see the reading or experience as consistent or inconsistent with what you have learned so far, implications for the future, etc. Reflection should include more content than just a recitation of facts and you should document your writing with a minimum of three references.

Self –Assessment

1. Critically reflect (see note above; not just recitation of facts) upon the knowledge you gained from the activity.
2. Critically reflect upon the relationship between any new information you gained from the activity with old information you previously held to be true.
3. How did the relationship between the old and new information you learned affect your personal experience with the activity?

Learn as a Learner

1. Critically reflect (see note above; not just recitation of facts) upon your approach and strategies used in completing the activity.
2. Critically reflect upon how you learn as a learner and how you assess your own performance in completing the activity.
3. How did your learning and interaction with colleagues (such as discussion forum, web conferences, wiki and blog participation, etc.) affect the results of your performance?

Lifelong Learning Skills

1. Critically reflect (see note above; not just recitation of facts) upon what you gained about learning and how you learn that will impact your future learning.
2. How will your past interactions and collaborations with colleagues impact your future learning experiences?

3. As a lifelong learner, what questions or issues challenge you and are worthy of future research or investigation?

Additional Criteria

1. Field-based Activities Summary Report posted monthly to e-Portfolio wiki/blog/Google site
2. Mechanics
3. APA Format
4. Minimum of 3 References
